Quality Assurance Technical Abilities Continue to Grow at Carrier Plastics

Auburn, NY Carrier Plastics has a long reputation for providing the marketplace with high level custom Injection Molding and Blow Molding products. The engineering resources of the company continue to grow and attain the highest level of capabilities. The same can be said about the Quality Assurance function of the company as well.

The Quality Assurance group is part of the Product Development department that works very closely with the Design Department and Project Management. This strategic alignment utilizes the talent of all three groups to align product development from start to finish. The end result is a highly developed flow through of information to assure capable Design For Manufacturability (DFM) product lines with exceptional quality levels.

The “talent” of the group consists of former occupations such as Operations Manager, Plant Manager, Quality Manager and various Quality Engineering backgrounds adding up to well over 100 years of combined experience in the field. “The abilities of this group never cease to amaze me in their depth, insight and talent level. I truly believe there is nothing that is beyond our capabilities,” says Joel Sieber Product Development Manager.

The American Society for Quality (ASQ) certifications within the group include:

- (3) Certified Quality Engineers (CQE)
- (5) Certified Quality Technicians (CQT)
- (1) Certified Quality Improvement Associate (CQIA)
- (1) Certified Mechanical Inspector (CMI)

Carrier Plastics is located in the heart of central New York and has been custom molding for a variety of industries such as plastic packaging, beauty and cosmetics, amenities, household consumables, electronic connectors and medical measuring devices since 1982.
