Currier Plastics invests in new Negri Bossi VE 370, 400 Ton IM machine

Auburn, NY. The Negri Bossi 400 Ton Injection Molding machine has joined the Currier Plastics Family, filling a niche in their growing processing capabilities in the cap and closure market. The all electric Negri Bossi has a digital front end making it more efficient to operate than older models.

Currier Plastics is committed to making intelligent operational decisions, especially when they are preparing to purchase a new machine. Currier Plastics CFO Mike Cartner remarked that “by making the choice to replace some of our equipment with new state of the art technology, we can continue to reduce our cost of doing business and be more competitive for our customers. The digital control technology that accompanies the newer machines has increased output by producing repeatable component consistently, while at the same time reducing downtime for maintenance and lowering scrap rates.”

As a multidiscipline processor (Injection Molding, Extrusion Blow Molding & Injection Stretch Blow Molding) Currier Plastics has continued to grow in the Packaging, Electronics, Medical and Instrumentation markets and was recently recognized as 2010 Economic Champion by the CenterState Corporation for Economic Opportunity. The honorees were recognized for their contributions to the economic growth of central New York region through capital expenditures in areas of new jobs, expansion and capital investments.
